PROFESSIONAL SUMMARY

Frontend-focused Software Engineer with a passion for building clean, responsive web applications in React.js ,React Native and Next.js. I specialize in creating scalable UI components and bridging the gap between design and backend systems using FastAPI. Thriving in agile teams, focusing on performance and cross-browser compatibility to deliver polished, production-ready code.

TECHNICAL SKILLS

Front-End: HTML, CSS, JavaScript, React Native,React.js ,Typescript
Frameworks & Tools:Git, GitHub

EXPERIENCE

Jr. Software Engineer (Frontend Developer)

SecurXperts Technologies Pvt. Ltd. (Oct 2025 – Present)

- Developing scalable and responsive web applications using React.js, JavaScript (ES6+), HTML5, CSS3, and Tailwind CSS.
- Built and maintained reusable UI components, reducing development time by 25% and ensuring design consistency across modules.
- Integrated RESTful APIs with frontend, improving data handling efficiency and reducing API response handling errors by 20%.
- Optimized application performance using lazy loading, code splitting, and memoization, improving page load speed by 30%.
- Enhanced user experience by implementing responsive design and cross-browser compatibility, increasing user engagement.
- Debugged and resolved UI issues, reducing frontend bugs by 30% and improving application stability.
- Collaborated with backend developers and designers in an Agile (Scrum) environment, ensuring timely delivery of features.
- Used Git for version control and participated in code reviews to maintain high-quality code standards.

PROJECTS

RobnGrab – Job Portal Platform)

• Developed a job portal web application similar to modern job platforms using Next.js.

• Built dynamic job listing pages, search interfaces and interactive UI components.

• Integrated backend services using FastAPI for API communication and data retrieval.

• Implemented reusable components and optimized page rendering using Next.js routing.

• Ensured responsive layouts and cross-browser compatibility**.**

Hospital Management System Frontend (React.js)

• Developed frontend modules for managing patient records and hospital workflows.

• Built dashboards and form-based interfaces for data entry and management.

• Integrated APIs to dynamically retrieve and display patient information.

• Implemented responsive layouts for efficient administrative usage.

LAURATEK

- Designed and documented UI components and frontend workflows using React.js-based applications.
- Created detailed technical and user documentation for features, APIs, and application usage.
- Worked closely with development teams to ensure accurate documentation of system functionality.
- Contributed to improving developer onboarding through structured and easy-to-understand documentation.

CERTIFICATIONS

Front-End Developer (Java) – Web design, debugging, and responsive UI creation. Amazon Web Services (AWS) – Hands-on training in cloud deployment and architecture.
AI-ML Internship (AWS Collaboration, Sept–Nov 2023) – Built and deployed machine learning models.

EDUCATION

B.Tech,CSE – Eluru College of Engineering & Technology, 2024 – 60%

Intermediate, MPC – Narayana Junior College, 2020 – 60%

SSC – Sri Sai High School, 2018 – GPA: 7.4

-
